Hardware details   ⌄

Enterprise Features

Available only with the Commercial Suite

Windows Microsoft Store for business

Your IT department can also set up an enterprise private store, containing only your company's apps for your specific HoloLens usage. Securely distribute your enterprise software to selected group of enterprise users.

Mobile Device Management (MDM) for HoloLens

Your IT department can manage multiple HoloLens devices simultaneously using solutions like Microsoft InTune. You will be able to manage settings, select apps to install and set security configurations tailored to your organization's need.

Kiosk mode

With HoloLens kiosk mode, you can limit which apps to run to enable demo or showcase experiences.

Windows Update for Business

Controlled operating system updates to devices and support for long term servicing branch.

Identity

Azure Active Directory and next generation credentials with PIN unlock.

Data security

BitLocker data encryption and secure boot is enabled on HoloLens to provide the same level of security protection as any other Windows device.

Work access

Anyone in your organization can remotely connect to the corporate network through a virtual private network on a HoloLens. HoloLens can also access Wi-Fi networks that require credentials.

Everything you need to get started

Resources

Begin building amazing experiences for HoloLens with the Windows 10 SDK, familiar tools, and a steady stream of new documentation, tutorials, and case studies authored by the HoloLens engineering team.
